### PET FACT FILE

## Chilean rose tarantula

#### Scientific Name:

Grammostola rosea

Class: Arachnida

**Lifespan:** Females live round 20 years. Males live 2-4 years

Threats: Birds, reptiles,

mammals

**Distribution:** Native to Chile

Habitat: Desert and scrub habitats urban areas, and wetlands.

Width: Up to 5 inches

Weight: Around 250 grams

**Diet:** Insects. Prey is injected with venom and enzymes that begin breaking it down into ingestible fluids.

Housing: A glass tank

### Things To Know:

Chilean Rose Tarantulas need soil in the bottom of the tank and it should allow the tarantula to burrow. It needs a hide to feel safe.

The temperature of the tank should be around 75 degrees.

### Interesting fact:

Unlike other most other spiders, tarantulas do not catch prey in webs.

They stalk and attack their prey similar to a jaguar.
